## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 15, 17-22, 29-32 and 34-50, are drawn to a method of prion detection comprising contacting the sample with an apolipoprotein.

Group II, claim(s) 16 and 33, are drawn to a method of measuring apolipoprotein B and correlating such measurements to a prion-related disease.

Group III, claim(s) 27, are drawn to a diagnostic kit.

Group IV, claim(s) 51-57, are drawn to a method for treating a prion disease comprising administration of a modulator of apolipoprotein B.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions lack novelty over the prior art. Specifically, Namba and Ikeda (1996) performed immunohistochemistry to examine whether or not apoB was associated with amyloid protein and described positive staining (see Abstract). Additionally, Namba et al (1991) demonstrated that apolipoprotein E immunoreactivity is associated with both kuru and CJD. Thus, no special technical feature exists for Group I-IV as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical special feature of the Groups is not a special technical feature, unity of invention is lacking.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1648

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHELLE HORNING whose telephone number is (571)272-9036. The examiner can normally be reached on Monday-Friday 8:00-5:00 EST.
